

Rectilinear propagation of light

The shortest distance between two points is a straight line and light travels in a straight line. It cannot bend around edges. This is known as the rectilinear propagation of light. The students of grade 4 were divided into groups. Each group did an experiment to observe that light travels in a straight line. This activity surely did help the students to get clarity of the experiment, helped them build team spirit, patience and leadership skills.

Math Wizards

We all love to explore patterns and ideas. Our students enjoyed doing a few activities in our math lab wherein they worked on various Math concepts like Tangram, Bingo on tables, Number tree, lines of Symmetry, Contributions of great Mathematicians, making spin wheel to understand the concept of Probability etc .These activities built interest and confidence among the students in learning the subject better.

Books are our best friends!

The Grade 5 students along with their form tutor, Ms. Silvia presented a melange of thoughts, ideas, expressions in their class assembly presentation on the 6th, December 2022 in the School Auditorium. The theme of the assembly was "Books and Authors". The students conveyed a beautiful message on how books inspire us to become the best version of ourselves. The students took us through a ramp walk of their favorite book characters and later followed by a play with foot tapping music that enlightened us about the importance of taking care of our books. The assembly ended it with a quiz. Ms.Thanu appreciated the excellent performance by the students and helped us remember that a beautiful treasure chest of everlasting knowledge is reading.

Expert talk on 'Healthy Balanced Diet'

It is health that is real wealth. We had an expert talk on a Healthy Balanced Diet. The students learnt that a healthy diet involves a variety of foods in the correct proportions. Not only did they learn that a healthy lifestyle is only concerned about avoiding any kind of sickness, but also improving our mental, physical and social well-being.

Celebrating the season of joy and giving

Christmas brings cheer and love! It was surely a Christmas to remember for us at Nalapad Academy as we celebrated it with the same fervor, spreading the message of love and joy among our children. The celebration started with all our students thanking and showing gratitude to our support staff by giving them 'thank you' cards. They also assisted our chefs in cooking a sumptuous meal and personally served the support staff. The students then decorated their designated area in the school auditorium with their respective housemates for an inter-house competition in the most festive manner!

We had a wonderful Christmas assembly that illuminated the story of the birth of Lord Jesus Christ through a nativity scene. Students and staff sang and danced to the sound of Christmas Carols.
